-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In response to a first restriction requirement dated 06/20/06, applicant elected the claims of Group II and the apparatus depicted in Figure 12 for prosecution. Applicant asserted that *“the restriction requirement is improper. The elected claims relate to methods of operating a fuel cell whereas the eight allegedly distinct and non-overlapping species depicted in each of Figures 6-9 and 11-15 show various fuel cells envisaged by the invention. In fact, methods are best reflected in Figures 20-27 and most preferably Figure 27”*. In addition to this applicant’s assertion, the examiner would have expected applicant’s cooperation to further identify mutually exclusive species of the multiple methods claimed in elected claims 11-16, 22-62, 64-80, 85-93 and 96-101 to expedite prosecution but applicant went for arguing that the elected methods should be examined together because they are not limited to being carried out by the particular fuel cell configuration and they should be examined on the merits irrespective of the eight allegedly distinct and non-overlapping species depicted in the each of the above-mentioned Figures.

Consequently, given that applicant’s elected methods are best reflected in Figures 20-27, the examiner is herein issuing an election of species in direct connection with such methods and figures. Applicant’s cooperation to identify specific embodiments of the elected methods based upon the illustrations of Figures 20-27 is kindly requested. Again, applicant’s cooperation to further identify or delineate additional embodiments of the claimed methods is also welcomed as a bona-fide attempt to expedite prosecution.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species 1: the method reflected in Figure 20;

Art Unit: 1745

Species 2 the method reflected in Figure 21

Species 3: the method reflected in Figure 22;

Species 4: the method reflected in Figure 23;

Species 5: the method reflected in Figure 24;

Species 6: the method reflected in Figure 25;

Species 7: the method reflected in Figure 26;

Species 8: the method reflected in Figure 27.

The species are independent or distinct because they all represent mutually exclusive embodiments which do not overlap in scope.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1745

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond Alejandro whose telephone number is (571) 272-1282. The examiner can normally be reached on Monday-Thursday (8:00 am - 6:30 pm).
